

Helping Construction 'Go-Smart'

Build UK and CECA SmartCard Audit Results 2017

41 organisations

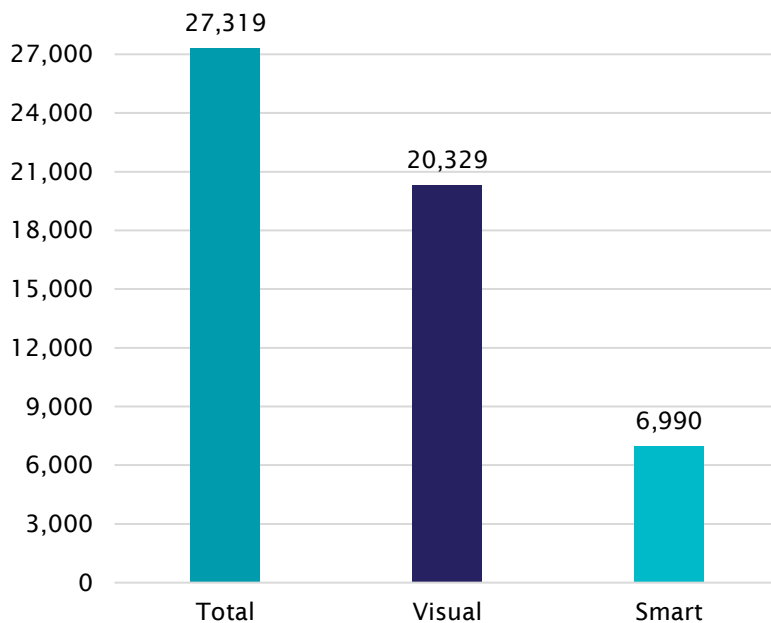

570 sites

Over 27,300 cards audited

On 8 February 2017, Build UK and CECA members took part in a SmartCard Audit to understand how widely Smart technology is being used to read cards carrying the CSCS logo. CSCS SmartCards can be read using the 'Go-Smart' app with a card reader or device with near-field communications capacity.

26% of cards audited using Smart technology

39% of organisations that participated used Smart technology

715 cards had expired

12 cards were found to be fraudulent*

Build UK and CECA are supporting members to adopt Smart technology in their daily activities to protect against fraud and ensure all employees have the correct and up-to-date qualifications and training for the occupation they are undertaking.

*Fraudulent cards are only identified if the card is read using Smart technology. All fraudulent cards that were identified were passed to the Police for investigation.
