

Pre-qualification costs the construction industry up to

£1 billion
a year

The [Common Assessment Standard](#), developed by Build UK, has transformed the construction pre-qualification (PQ) process, improving efficiency, reducing cost and raising quality standards.

A [growing list](#) of organisations across the public and private sectors are now specifying the industry-recognised standard, which can be used to demonstrate companies have the organisational capability to fulfil their roles under the Building Safety Act.

27

Contractors and Clients specifying the Common Assessment Standard for their supply chains

6

Trade Associations accepting the standard as part of their membership audit scheme

21,000

Supply Chain Companies certified to the standard

Key Features

1

Certification per year from a choice of Recognised Assessment Bodies

2

Levels of certification – desktop and site-based to suit a company's needs

176

Questions covering 10 key areas to fully assess a company's organisational capability

33

Key questions for which data is shared between Recognised Assessment Bodies
