common assessment standard

Pre-qualification costs the construction industry up to

£1 billion
a year

The **Common Assessment Standard**, developed by Build UK, is designed to improve efficiency and reduce cost in the construction pre-qualification (PQ) process.

A growing number of organisations across the public and private sectors are now using the industry-recognised standard which is not only minimising duplication across the industry but raising the bar in assessing the competence of the supply chain.

Key Features

1
Certification per year from a choice of Recognised Assessment Bodies ✓

2
Levels of certification – desktop and site-based to suit a company's needs ✓

234
Questions covering 10 key areas to fully assess a company's competence ✓

29
