# 5 s to power up construction

The Government has committed to 'get Britain building again' as part of its national mission to deliver sustained economic growth.

It has a key role to play in delivering the homes and infrastructure the country needs and so does the construction industry.

Build UK is calling on the Government to focus on '5 Ps' to power up construction and help improve lives and communities across the UK.

## **PEOPLE**

Investment in the development of people supported from education into employment and throughout their careers.

#### **PERFORMANCE**

Enhanced performance throughout the supply chain, with clear regulation and standards consistently applied to deliver safe buildings and high-quality infrastructure.

#### **PIPELINE**

An agreed and funded pipeline of sustainable economic and social infrastructure, which is regularly reviewed and updated, providing certainty and continuity for the next 10 years.

## **PLACES TO LIVE**

Suitable and sufficient places to live delivered through improved planning, more suitable sites, and properly funded retrofit programmes.

### **PROCUREMENT**

Effective and efficient procurement of projects, including implementation of the Construction Playbook, appropriate allocation of risk and fair payment practices.
