

An Industry-Wide Pre-Qualification System

Pre-qualification costs the construction industry up to £1 billion each year. Build UK is rolling out the Common Assessment Standard to improve efficiency and reduce duplication in the pre-qualification process.

- ✓ Accepted by a growing list of contractors and clients across the industry
- ✓ Annual certification from your choice of Recognised Assessment Body
- ✓ Two levels of certification – desktop and site-based – to suit your business
- ✓ Recognises other certifications such as ISOs saving time during the audit process
- ✓ Option to share your key pre-qualification data with other Recognised Assessment Bodies so it is visible to more contractors and clients
